ECS Project No. 51: 2106

Reference: Phase I Environmental Site Assessment Report, REDI Arkansas Manufacturing Center, US Highway 67 and Miller County Road 64, Texarkana, Miller County, Arkansas 71854

Dear Mr. Sitterley:

ECS Southwest, LLP (ECS) is pleased to provide you with the results of our Phase I Environmental Site Assessment (ESA) for the referenced site. ECS services were provided in general accordance with ECS Proposal No. 51:2133 authorized on February 2, 2021 and generally meet the requirements of ASTM E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process and EPA Standards and Practices for All Appropriate Inquiries contained in 40 CFR Part 312.

If there are questions regarding this report, or a need for further information, please contact the undersigned.

ECS Southwest, LLP

ENVIRONMENTAL PROFESSIONAL STATEMENT

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Magur 24

1.0 EXECUTIVE SUMMARY

ECS Southwest, LLP (ECS) was contracted by AR-TX Regional Economic Development, Inc to perform an ASTM E1527-13, Phase I Environmental Site Assessment (ESA) of the REDI Arkansas Manufacturing Center located at US Highway 67 and Miller County Road 64 in Texarkana, Miller County, Arkansas (i.e. subject property). This Executive Summary is an integral part of the Phase I ESA report. ECS recommends that the report be read in its entirety.

The subject property is identified by the Miller County Assessor as Property Identification Numbers (PIN) 00027500, 00032800, 00033200, 00034401, and 00034700 and owned by City of Texarkana Public Facilities Board. The approximately 1,407.5805-acre subject property is occupied by two former single family residence, a pole barn, a corrugated steel barn, a former rendering plant, and two shipping containers used for storage. The subject property is serviced by well water with no operating sewage system on the property, however the eastern house was formerly serviced by a septic system. The residences and rendering plant were formerly heated with wood and propane.

The subject property is located in a rural, agricultural area of Texarkana, Arkansas. The subject property is bound on the north by US Highway 67, a railroad, Interstate 30, and undeveloped land with residential and agricultural land beyond the roads, on the east by undeveloped and agricultural land, on the south by undeveloped and agricultural land, and on the west by agricultural land. ECS did not identify environmental issues at adjoining or nearby properties that are believed to present a recognized environmental condition (REC) at the subject property.

Based on the records search, site reconnaissance and interviews, it appears that the subject property was developed with several residences and agricultural buildings since at least 1948. Over time, the residences have been abandoned or repurposed, leaving agricultural and undeveloped land supported by two centrally located barns along County Road 64. Historical records prior to 1948 were not reasonably ascertainable for the subject property.

Our review of historical information for adjoining or nearby properties identified the area as originally rural, agricultural land that has remained so for several decades.

A regulatory database search report was provided by Environmental Data Resources. The database search involves researching a series of Federal, State, Local, and other databases for facilities and properties that are located within specified minimum search distances from the subject property. The report did identify the subject property on the databases researched. The Environmental Data Resources report identified several off-site properties within the minimum ASTM search distances. Based on our review of available public records, none of the listings are believed to represent a REC for the subject property.

ASTM E1527-13 defines a "data gap" as: "a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information." Data gaps which would be expected to impact our ability to render a professional opinion concerning the subject property were not identified.

We have performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM E1527-13 of the REDI Arkansas Manufacturing Center located at US Highway 67 and Miller County Road 64 in Texarkana, Miller County, Arkansas. Exceptions to, or deletions from, this practice are described in Section 2.6 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the property.

The following Business Environmental Risks (BERs) and/or additional considerations were identified:

• An unused steel tank was observed on the northern boundary of the subject property, west of the County Road 64 railroad crossing. Mr. Skipper Davis was unsure of the tanks origin or prior use. ECS considers the unused steel tank to represent a BER for the subject property due the lack of documentation or knowledge with regards to its origins or prior use.

2.0 INTRODUCTION

2.1 Purpose and Reason for Performing Phase I ESA

The purpose of the ESA was to:

- evaluate the probability of impact to the surface water, groundwater and/or soils within the property boundaries through a review of regulatory information and a reconnaissance of the subject property and vicinity;
- evaluate historical land usage to identify previous conditions that could potentially impact the environmental condition of the subject property;
- conduct all appropriate inquiry as defined by ASTM E1527-13 and 40 CFR Part 312;
- evaluate the potential for on-site and off-site contamination; and,
- provide a professional opinion regarding the potential for environmental impact at the site and a list of Recognized Environmental Conditions (RECs).

The ESA should allow the Users the opportunity to qualify for landowner liability protection under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) provided certain stipulations are met. The landowner liability protections are: an innocent landowner, a contiguous property owner, or a bona fide prospective purchaser. The User must meet the protection stipulations detailed in CERCLA to qualify as well as meet the User Obligations contained within the ASTM E1527- 13 standard.

The reason for conducting this ESA is to perform all appropriate inquiries into the uses and prior ownership of the subject property.

2.2 Scope of Services

The environmental assessment was conducted in general accordance with ASTM E1527-13 and EPA Standards and Practices for All Appropriate Inquiry (40 CFR §312.10). The environmental assessment was conducted under the supervision or responsible charge of an individual that qualifies as an environmental professional, as defined in 40 CFR §312.10.

ECS was contracted by AR-TX Regional Economic Development, Inc to perform an ASTM E1527-13, Phase I Environmental Site Assessment (ESA) of the REDI Arkansas Manufacturing Center located at US Highway 67 and Miller County Road 64 in Texarkana, Miller County, Arkansas. ECS was not contracted to address non-scope considerations.

2.3 Definitions

ASTM E1527-13 defines a "recognized environmental condition (REC)" as "the presence or likely presence of any hazardous substances or petroleum products in, on or at a property: 1) due to release to the environment, 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment." For the purposes of this practice, "migrate" and "migration" refer to the movement of hazardous substances or petroleum products in any form including solid and liquid at the surface or subsurface and vapor in the subsurface.

ASTM E1527-13 defines a "business environmental risk" (BER) as "a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice". ECS also uses the term "Other Environmental Considerations" to discuss BERs and environmental concerns outside of the ASTM E1527-13 requirements (radon, asbestos, lead, wetlands, etc.). Client-imposed limitations and site condition limitations, if encountered, are detailed in Section 7.1 Methodology and Limiting Conditions.

ASTM E1527-13 defines a "*de minimis* condition" as a condition that generally does not represent a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. De minimis conditions are not recognized environmental conditions nor controlled recognized environmental conditions.

ASTM E1527-13 defines a "controlled recognized environmental condition (CREC)" as a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition identified as a controlled recognized environmental condition does not imply that the Environmental Professional has evaluated or confirmed the adequacy, implementation or continued effectiveness of the required control that has been, or is intended to be, implemented.

ASTM E1527-13 defines a "historical recognized environmental condition (HREC)" as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the Environmental Professional must determine whether the past release is a recognized environmental condition at the time the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria).

2.4 Limitations

The ESA involved a reconnaissance of the subject property and contiguous properties and a review of regulatory and historical information in general accordance with the ASTM standard and EPA regulation referenced herein. No non-scope considerations or additional issues such as asbestos, radon, wetlands or mold were investigated, unless otherwise described in Section 8.0 of this report.

Note: vapor migration in the subsurface is described in Guide E2600 published by ASTM. ECS has not been contracted to conduct a Vapor Encroachment Screen in accordance with the E2600 guide.

The conclusions and/or recommendations presented within this report are based upon a level of investigation consistent with the standard of care and skill exercised by members of the same profession currently practicing in the same locality under similar conditions. The intent of this assessment is to identify the potential for recognized environmental conditions in connection with the subject property; however, no environmental site assessment can completely eliminate uncertainty regarding the potential for recognized environmental conditions in connection with the subject property. The findings of this ESA are not intended to serve as an audit for health and safety compliance issues pertaining to improvements or activities at the subject property. ECS is not liable for the discovery or elimination of hazards that may potentially cause damage, accidents or injury.

Observations, conclusions and/or recommendations pertaining to environmental conditions at the subject property are necessarily limited to conditions observed, and or materials reviewed at the time this study was undertaken. It was not the purpose of this study to determine the actual presence, degree or extent of contamination, if any, at this subject property. This could require additional exploratory work, including sampling and laboratory analysis. No warranty, expressed or implied, is made with regard to the conclusions and/or recommendations presented within this report.

This report is provided for the exclusive use of AR-TX Regional Economic Development, Inc. This report is not intended to be used or relied upon in connection with other projects or by other unidentified third parties. The use of this report by any undesignated third party or parties will be at such party's sole risk and ECS disclaims liability for any such third party use or reliance. The use of this report is subject to the same terms, conditions and scope of work reflected in this report and the associated proposal.

2.5 Data Gaps

Data failures (historical data gaps) were identified during the historical research of this subject property. Use of the subject property was generally documented back to 1948. Historical information was missing for various periods. However, due to the apparent current and historical uses of the subject property; the historical data gaps are not expected to impact our ability to render a professional opinion regarding the subject property.

2.6 Limiting Conditions/Deviations

ASTM E1527-13 requires that the Environmental Professional identify limiting conditions, deletions, and deviations from the ASTM E1527-13 standard, if any, including client-imposed constraints. Limiting conditions and/or deviations from the standard practice that would be expected to impact our ability to provide a professional opinion concerning the subject property were not encountered during the performance of this Phase I ESA.

3.0 SUBJECT PROPERTY DESCRIPTION

3.1 Subject Property Location and Legal Description

Site Name	REDI Arkansas Manufacturing Center
Property Address	US Highway 67 and Miller County Road 64
Property City, State	Texarkana, Arkansas
Property County	Miller County
Number of Parcels	Five (5)
Property ID Number(s)	00027500, 00032800, 00033200, 00034401, and 00034700
Property Size	1,407.5805 Acres
Property Owner of Record	City of Texarkana Public Facilities Board
Property Legal Description	00027500: Subdivision:10-14S-27WBlock/Lot:N/A / N/ AS-T-R:10-14S-27WSize (Acres):75.21Legal: PT UNIT #9-24 & 25 USS S OF I-30 PT SE S OF HWY 00032800: TAR Subdivision:11-14S-27WBlock/Lot:N/A / N/ AS-T-R:11-14S-27WSize (Acres):226.60Legal:S/2 SE & SW 00033200: TAR Subdivision:12-14S-27WBlock/Lot:N/A / N/ AS-T-R:12-14-27Size (Acres):159.25Legal:SW 00034401: MC 64 & HWY 67 Subdivision:15-14S-27WBlock/ Lot:N/A / N/AS-T-R:15-14S-27WSize (Acres):595.08 Legal: ALL EXCPT 3.01 AC IN W/2 & EXCEPT 42.91AC IN NW NW 00034700: Subdivision:16-14S-27WBlock/Lot:N/A / N/ AS-T-R:16-14-27Size (Acres):292.80Legal:S OF R ALL

3.2 Physical Setting and Hydrogeology

USGS Topographic Map			
Quad Designation	Fulton, AR and Homan, AR Quadrangles		
Date	2020		
Subject Property Settings			
Average Subject Property Elevation (in feet or meters)	Approximately 245 above mean sea level (amsl)		
General Sloping Direction	East-southeast		
Bodies of Water	A pond is located south of the intersection of Interstate 30 and US Highway 67.		

General Directions of Surface Flow	East-southeast
Presumed Direction of Groundwater Flow	East-southeast
Geologic Province	Qal - Alluvium
Up-gradient Property Direction	West-northwest

Nearby Properties' Setting			
General Sloping Direction East-southeast			
Bodies of Water	A pond is located between Interstate 30 and US Highway 67, north of the subject property. A flood control channel is located along the eastern boundary of the subject property.		
General Directions of Surface Flow	East-southeast		
Presumed Direction of Groundwater Flow	East-southeast		

Regional influences may have an impact on groundwater flow. The actual groundwater flow direction cannot be determined without site-specific information obtained through the gauging of groundwater monitoring wells.

3.3 Current Use and Description of the Site

The subject property consists of an approximately 1,407.5805-acre tract of land that is currently utilized for agriculture. The subject property is improved with a single family residence, a barn, several sheds, and a chicken coop. The subject property is located in an area that can generally be described as rural, agricultural.

4.0 USER PROVIDED INFORMATION

The ASTM standard includes disclosure and obligations of the User to help the Environmental Professional identify the potential for Recognized Environmental Conditions associated with the subject property. The ASTM E1527-13 User Questionnaire was submitted to and completed by Rob Sitterley, representing AR-TX Regional Economic Development, Inc (User of the report). Section 4.0 is based on the completed User Questionnaire. A copy of the completed User Questionnaire is included in Appendix II.

4.1 Title Information

ECS was not provided with title information by the User. If this information is provided following issuance of this report and information contained therein materially changes the outcome of this report, ECS will issue an addendum to this report.

4.2 Environmental Liens or Activity and Use Limitations

ECS was neither contracted to obtain information on environmental liens or activity and use limitations, nor have we been provided with information on environmental liens or activity and use limitations for our review. It should be noted by the User of this report that if the User does not obtain activity and use limitation information, the User that is seeking to qualify for an innocent landowner, a contiguous property owner, or a bona fide prospective purchaser liability defense may lose these rights to qualify under CERCLA. If the activity use information is provided following issuance of this report and information contained therein materially changes the outcome of this report, ECS will issue an addendum to this report.

4.3 Specialized Knowledge

The User indicated that they did not possess specialized knowledge regarding historical uses that may reveal environmental issues at the subject property.

4.4 Commonly Known or Reasonably Ascertainable Information

The User indicated that the subject property has been used for cattle grazing and as a walnut orchard.

4.5 Valuation Reduction for Environmental Issues

According to the User, the purchase price being paid for the subject property reasonably reflects its fair market value.

4.6 Owner, Property Manager, and Occupant Information

The User indicated that the subject property was owned by the City of Texarkana, Arkansas Public Facilities Board and managed by Mr. Rob Sitterley.

4.7 Degree of Obviousness

The User stated that they were not aware of obvious indicators that point to the presence or likely presence of contamination at the subject property.

5.0 RECORDS REVIEW

A regulatory records search of ASTM standard and supplemental databases was conducted for the subject property and is included in Appendix III. The regulatory search report in the appendix includes additional details about the regulatory databases that were reviewed. The regulatory records search involves searching a series of databases for facilities that are located within a specified distance from the subject property. The ASTM standard specifies an approximate minimum search distance from the subject property for each database. Pursuant to ASTM, the approximate minimum search distance may be reduced for each standard environmental record except for Federal NPL site list, and Federal RCRA TSD list. According to ASTM, government information obtained from nongovernmental sources may be considered current if the source updates the information at least every 90 days or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public. The following table indicates the standard environmental record sources and the approximate minimum search distances for each record.

Standard Environmental Record Sources	Approximate Minimum Search Distance Per ASTM (miles)	Subject Property	Off-Site Properties
Federal NPL	1.0	No	0
Federal Delisted NPL	0.5	No	0
Federal CERCLIS	0.5	No	0
Federal CERCLIS NFRAP	0.5	No	0
Federal RCRA CORRACTS	1.0	No	0
Federal RCRA non-CORRACTS TSD	0.5	No	0
Federal RCRA Generators	Subject Site and Adjoining Properties	No	0
Federal IC/EC	Subject Site Only	No	N/A
Federal ERNS	Subject Site Only	No	N/A
State and Tribal Hazardous Waste Sites (NPL Equivalent)	1.0	No	0
State and Tribal Hazardous Waste Sites (CERCLIS Equivalent)	0.5	No	0
State and Tribal Landfill and/or solid waste disposal sites	0.5	No	0

Standard Environmental Record Sources	Approximate Minimum Search Distance Per ASTM (miles)	Subject Property	Off-Site Properties
State and Tribal Leaking Tanks	0.5	No	0
State and Tribal Registered UST and AST	Subject Site and Adjoining Properties	No	0
State and Tribal IC/EC	Subject Site Only	No	N/A
State and Tribal Voluntary Cleanup (VCP)	0.5	No	0
State and Tribal Brownfield Sites	0.5	No	0
Aerometric Information Retrieval System (AIRS)	0.5	No	2
Enforcement	Subject Site and Adjoining Properties	No	1
Permits	Subject Site Only	No	2
SPILLS	Subject Site and Adjoining Properties	No	1
TIER 2	Subject Site and Adjoining Properties	No	1

Based on our knowledge of the subject property and the surrounding area, ECS attempts to verify and interpret this data. While this attempt at verification is made with due diligence, ECS cannot guarantee the accuracy of the record(s) search beyond that of information provided by the regulatory report(s). ECS makes no warranty regarding the accuracy of the database report information included within the regulatory report(s).

The regulatory database search was performed by Environmental Data Resources, dated February 4, 2021. ECS did not reduce the minimum ASTM search distances stipulated in the standard. The regulatory databases reviewed by ECS included supplemental databases researched by Environmental Data Resources.

5.1 Federal ASTM Databases

Neither the subject property nor properties within the designated search radii were identified on the federal databases researched for this assessment.

5.2 State ASTM Databases

Neither the subject property nor properties within the designated search radii were identified on the state databases researched for this assessment.

5.3 Additional Environmental Record Sources

5.3.1 Additional Non-ASTM Federal Databases

Neither the subject property nor properties within the designated search radii were identified on the federal databases researched for this assessment.

5.3.2 Additional Non-ASTM State Databases

5.3.2.1 Other State Database

AIRS

Permitted facility emissions and stack data for the state.

River Valley Animal Foods, 5465 Miller County Road 64 - EDR reported that the facility was located on the subject property. However, ECS Identified the facility approximately 2.43 miles east-southeast of the subject property. Based on its distance, ECS does not consider the facility to represent a REC for the subject property.

Enforcement

Violations issued to facilities in various Department of Environmental Quality programs, including Air, Hazardous Waste, Storage Tanks, Solid Waste and Water.

River Valley Animal Foods, 5465 Miller County Road 64 - EDR reported that the facility was located on the subject property. However, ECS Identified the facility approximately 2.43 miles east-southeast of the subject property. Based on its distance, ECS does not consider the facility to represent a REC for the subject property.

Permits

A list of sites permitted by the Department of Environmental Quality, including Air, Mining, Solid Waste and Water.

River Valley Animal Foods, 5465 Miller County Road 64 - EDR reported that the facility was located on the subject property. However, ECS Identified the facility approximately 2.43 miles east-southeast of the subject property. Based on its distance, ECS does not consider the facility to represent a REC for the subject property.

SPILLS

Spills and releases notified to the Department of Environmental Quality.

River Valley Animal Foods, 5465 Miller County Road 64 - EDR reported that the facility was located on the subject property. However, ECS Identified the facility approximately 2.43 miles east-southeast of the subject property. Based on its distance, ECS does not consider the facility to represent a REC for the subject property.

TIER 2

A listing of facilities which store or manufacture hazardous materials and submit a chemical inventory report.

River Valley Animal Foods, 5465 Miller County Road 64 - EDR reported that the facility was located on the subject property. However, ECS Identified the facility approximately 2.43 miles east-southeast of the subject property. Based on its distance, ECS does not consider the facility to represent a REC for the subject property.

5.3.3 Other Proprietary Databases

Neither the subject property nor properties within the designated search radii were identified on the proprietary databases researched for this assessment.

5.3.4 Unmapped (Orphan) Facilities and Sites

Several properties were identified on the Orphan Summary List. Orphan facilities are considered as unmappable because the facility information in the database is insufficient and does not report accurate facility location. Based on available address and location information, ECS did not identify these facilities within the vicinity of the subject property.

5.4 Regulatory Review Summary

A regulatory database search report was provided by Environmental Data Resources. The database search involves researching a series of Federal, State, Local, and other databases for facilities and properties that are located within specified minimum search distances from the subject property. The report did identify the subject property on the databases researched. However, the facilities listed as on the subject property were actually located over 2 miles southeast. The Environmental Data Resources report identified no off-site properties within the minimum ASTM search distances. Based on our review of available public records, ECS does not consider the listings to be potential sources of soil, groundwater or vapor impact to the subject property. Therefore, ECS does not consider the listed sites to be RECs for the subject property.

6.0 HISTORICAL USE INFORMATION

6.1 Aerial Photograph Review

ECS reviewed aerial photographs of the subject property and immediately surrounding properties for evidence of former usage which may indicate potential environmental issues. The aerial photographs were obtained from Environmental Data Resources. The aerial photographs reviewed were dated 1948, 1970, 1975, 1985, 1994, 2000, 2010, 2013, and 2017. Aerial photographs dated prior to 1948 were not available for review. The ECS review is dependent on the quality and scale of the photographs. The following is a description of relevant information from the aerial photographs:

Year(s)	Subject Property	Adjoining Properties	REC? (yes or no)
1948	The subject property appeared to be predominantly agricultural and undeveloped land. The current drainage ditch was noted crossing the western portion of the subject property from northwest to southeast. Two residences were noted along County Road 64, on the central portion of the subject property. Several structures including a stable and barn were noted around the bend in County Road 64 on the northern portion of the subject property. A storage yard or cotton gin was observed at the intersection of County Road 64 and US Highway 67. Two residences and several outbuildings were noted on the eastern portion of the subject property. US Highway 67 was noted along the northern boundary of the subject property. FM 390 was noted along the western boundary of the subject property.	Adjoining properties appeared to be agricultural and undeveloped land with several residences on north adjoining properties.	No

Year(s)	Subject Property	Adjoining Properties	REC? (yes or no)
1970	The subject property appeared to be predominantly agricultural land with most trees being cleared. The current drainage ditch was noted crossing the western portion of the subject property from northwest to southeast. Two residences were noted along County Road 64, on the central portion of the subject property. Several structures including the current pole barn and corrugated steel barn were noted around the bend in County Road 64 on the northern portion of the subject property with the current eastern house located east of the building cluster. A storage yard with four structures was observed at the intersection of County Road 64 and US Highway 67. The current rendering plant was noted near the eastern boundary of the subject property. US Highway 67 and Interstate 30 were noted along the northern boundary of the subject property. FM 390 was noted along the western boundary of the subject property. A drainage canal was noted along the eastern boundary of the subject property.	Adjoining properties appeared to be agricultural and undeveloped land with several residences on north adjoining properties and one on a south adjoining property.	No

Year(s)	Subject Property	Adjoining Properties	REC? (yes or no)
1975	The subject property appeared to be predominantly agricultural land. The current drainage ditch was noted crossing the western portion of the subject property from northwest to southeast. One residence was noted along County Road 64, on the central portion of the subject property. Several structures including the current pole barn and corrugated steel barn were noted around the bend in County Road 64 on the northern portion of the subject property with the current eastern house located east of the building cluster. A storage yard with four structures was observed at the intersection of County Road 64 and US Highway 67. The current rendering plant was noted near the eastern boundary of the subject property. US Highway 67 and Interstate 30 were noted along the northern boundary of the subject property. FM 390 was noted along the western boundary of the subject property. A drainage canal was noted along the eastern boundary of the subject property.	Adjoining properties appeared to be agricultural and undeveloped land with several residences on north adjoining properties and one on a south adjoining property.	No

Year(s)	Subject Property	Adjoining Properties	REC? (yes or no)
1985	The subject property appeared to be predominantly agricultural land. The current drainage ditch was noted crossing the western portion of the subject property from northwest to southeast. One residence was noted along County Road 64, on the central portion of the subject property. Several structures including the current pole barn and corrugated steel barn were noted around the bend in County Road 64 on the northern portion of the subject property with the current eastern house located east of the building cluster. A storage yard with three structures was observed at the intersection of County Road 64 and US Highway 67. The current rendering plant was noted near the eastern boundary of the subject property. US Highway 67 and Interstate 30 were noted along the northern boundary of the subject property. FM 390 was noted along the western boundary of the subject property. A drainage canal was noted along the eastern boundary of the subject property.	Adjoining properties appeared to be agricultural and undeveloped land with several residences on north adjoining properties and one on a south adjoining property.	No

Year(s)	Subject Property	Adjoining Properties	REC? (yes or no)
1994 and 2000	The subject property appeared to be predominantly agricultural land. The current drainage ditch was noted crossing the western portion of the subject property from northwest to southeast. One residence was noted along County Road 64, on the central portion of the subject property. Several structures including the current pole barn and corrugated steel barn were noted around the bend in County Road 64 on the northern portion of the subject property with the current eastern house located east of the building cluster. Two structures were noted at the intersection of County Road 64 and US Highway 67. The current rendering plant was noted near the eastern boundary of the subject property. US Highway 67 and Interstate 30 were noted along the northern boundary of the subject property. FM 390 was noted along the western boundary of the subject property. A drainage canal was noted along the eastern boundary of the subject property.	Adjoining properties appeared to be agricultural and undeveloped land with several residences on north adjoining properties and one on a south adjoining property. A residence and several structures, including seven water towers or grain hoppers was located on a south adjoining property, off of County Road 64.	No

Year(s)	Subject Property	Adjoining Properties	REC? (yes or no)
2010, 2013, and 2017	The subject property appeared to be predominantly agricultural land with the northeastern portion appearing to be partially wooded. The current drainage ditch was noted crossing the western portion of the subject property from northwest to southeast. One residence was noted along County Road 64, on the central portion of the subject property. Several structures including the current pole barn and corrugated steel barn were noted around the bend in County Road 64 on the northern portion of the subject property with the current eastern house located east of the building cluster. One concrete foundations was noted at the intersection of County Road 64 and US Highway 67. The current rendering plant was noted near the eastern boundary of the subject property. US Highway 67 and Interstate 30 were noted along the northern boundary of the subject property. FM 390 was noted along the western boundary of the subject property. A drainage canal was noted along the eastern boundary of the subject property.	Adjoining properties appeared to be agricultural and undeveloped land with several residences on north adjoining properties and one on a south adjoining property. A residence and several structures, including seven water towers or grain hoppers was located on a south adjoining property, off of County Road 64.	No

6.2 Sanborn Fire Insurance Map Review

In an effort to identify past uses, ECS utilized Environmental Data Resources to search for historical Sanborn Fire Insurance Maps (Sanborn) for the subject property and surrounding area. Sanborn maps were not available for this area. The absence of such maps generally indicates that the subject property is located in an area where Sanborn maps were not produced because the area was

rural or it was not economically feasible. ECS does not expect the lack of Sanborn maps to impact our ability to render a professional opinion concerning the subject property given the amount of historical information obtained from our research, the USGS topographic map, aerial photographs, city directories, and other historical records obtained. A copy of the Unmapped Property report is included within Appendix IV.

6.3 Property Tax Files

Property tax files may include records of past ownership, appraisals, maps, sketches, photos or other information kept by the local jurisdiction for property tax assessment purposes. According to the Miller County tax assessor on-line information, the subject property is owned by City of Texarkana Public Facilities Board. The subject property is listed as a 1,407.5805-acre tract with identification numbers of 00027500, 00032800, 00033200, 00034401, and 00034700. Additionally, the on-site residence is reported as being constructed in 1936 and contains 952 square feet of space.

6.4 Recorded Land Title Records

Recorded land title records may include leases, land contracts, and AULs recorded by the local jurisdiction. Land title records may provide only a list of the names of previous owners and may be of limited use; however, they may provide useful information about uses or occupancy of the property when employed in combination with other sources.

ECS was not provided with Land Title Records.

6.5 Historical USGS Topographic Maps

Topographic maps are produced by the United States Geological Survey (USGS) for various time periods. ECS reviewed topographic maps of the subject property and immediately surrounding properties for evidence of former usage which may indicate potential environmental issues. The topographic maps were obtained from Environmental Data Resources and were dated 1951, 1970, 1975, and 2014. Topographic maps dated prior to 1951 were not available for review. The following is a description of relevant information from the topographic maps:

Year(s)	Subject Property	Adjoining Properties	REC? (yes or no)
1951 and 1970	Two structures were depicted on the eastern portion of the subject property. Three structures were located near the railroad long the northwestern boundary of the subject property. Ten structures were located along an unpaved road (now Miller County Road 64) in the central portion of the subject property. A pipeline was depicted crossing the subject property for northeast to southwest. A ditch was depicted crossing the western portion of the subject property from US Highway 67 to the southeast. Gillespie Ditch Levee was depicted along the eastern boundary of the subject property. US Highway 67 and a railroad were depicted along the northwestern boundary of the subject property.	Numerous structures were depicted on adjoining properties to the northwest, across US Highway 67. Other adjoining properties were depicted without structures.	No

Year(s)	Subject Property	Adjoining Properties	REC? (yes or no)
1975	Three structures were located near the railroad long the northwestern boundary of the subject property. Seven structures were located along an unpaved road (now Miller County Road 64) in the central portion of the subject property. A pipeline was depicted crossing the subject property for northeast to southwest. A ditch was depicted crossing the western portion of the subject property from US Highway 67 to the southeast. Gillespie Ditch Levee was depicted along the eastern boundary of the subject property. US Highway 67 and a railroad were depicted along the northwestern boundary of the subject property. Interstate 30 was depicted along a portion of the northern boundary of the subject property.	Numerous structures were depicted on adjoining properties to the northwest, across US Highway 67. Other adjoining properties were depicted without structures.	No

Year(s)	Subject Property	Adjoining Properties	REC? (yes or no)
2014	Structures were not depicted on the 2014 topographic map. A ditch was depicted crossing the western portion of the subject property from US Highway 67 to the southeast. County Road 64 was depicted crossing the subject property from north to south. Gillespie Ditch Levee was depicted along the eastern boundary of the subject property. US Highway 67 and a railroad were depicted along the northwestern boundary of the subject property. Interstate 30 was depicted along a portion of the northern boundary of the subject property. County Road 390 was depicted along the western boundary of the subject property.	Structures were not depicted on the 2014 topographic map.	No

6.6 City Directory Review

One of the ASTM standard historical sources to be reviewed for previous subject property uses is local street directories, commonly known as City Directories. The purpose of the directory review is to identify past occupants of the subject property, adjoining properties, or nearby properties. In some rural areas, street directories information is limited.

ECS reviewed city directories obtained from Environmental Data Resources. The directories reviewed were dated 1964, 1969, 1974, 1979, 1984, 1989, 1994, 1999, 2004, 2010, 2014, and 2014. The directories reviewed prior to 2010 did not provide listings for the subject property or surrounding area. Directories dated prior to 1964 were not available for review. The subject property address utilized for the research was US Highway 67 and Miller County Road 64. A copy of the city directory report is included in Appendix IV. The following is a description of relevant information from the city directories:

Year(s)	Subject Property	Adjoining Properties	REC? (yes or no)
2010	No Listing	11735 US Highway 67 - Denzil R Cowling 11945 US Highway 67 - Robert L Hickey 12045 US Highway 67 - Carl L Hickey 12105 US Highway 67 - Reggie D Kindrick 952 Miller County Road 64 - Queens Tree Plantation	
2014	No Listing	 11129 US Highway 67 - Red River Hydro Seeding 11571 US Highway 67 - Steven Nabors 11735 US Highway 67 - Denzil R Cowling 11945 US Highway 67 - Robert L Hickey 12045 US Highway 67 - Carl L Hickey 12105 US Highway 67 - Reggie D Kindrick 952 Miller County Road 64 - Queens Tree Plantation 	No
2017	No Listing	No Listing	No

6.7 Building Department Records

The term building department records means those records of the local government indicating permissions of the local government to construct, alter or demolish improvements on the property.

ECS contacted the Miller County Assessor to determine if they had historical information regarding construction dates, inspections, or other information regarding the subject property. No information has been received at the time of the report completion. If information is received that changes the conclusions or recommendations of this report, ECS will forward the information to the Client.

6.8 Zoning/Land Use Records

The term zoning/land use records refers to records of the local government indicating the uses permitted by the government in particular zones within its jurisdictions.

ECS reviewed zoning/land use records obtained from the City of Texarkana. The subject property is currently outside of the city limits and is not zoned.

6.9 Other Historical Sources

Other credible historical sources may be reviewed to identify past uses of the subject property. These sources may include websites, county or state road maps, historical society documents, or local library information.

The Miller County Emergency Management Department was contacted to determine if they had historical information regarding environmental issues or responses at the subject property. A Freedom of Information Act request was submitted to the Emergency Management Department on March 15, 2021. No information has been received at the time of the report completion. If information is received that changes the conclusions or recommendations of this report, ECS will forward the information to the Client.

6.10 Previous Reports

We have not been provided with environmental or engineering assessment reports for the subject property completed by others, nor has ECS completed similar studies or prior assessments of the subject property.

6.11 Historical Use Summary

According to historical research, the subject property has been agricultural and residential land and the area has remained rural, agricultural.

No obvious indications of RECs were identified in the historical data review.

7.0 SITE AND AREA RECONNAISSANCE

7.1 Methodology

Roger Willis of ECS conducted the field reconnaissance on March 2, 3, and 4, 2021. The weather at the time of the reconnaissance was 50-75 degrees Fahrenheit and clear. Observations were made from a walking reconnaissance around the perimeter, around the buildings, through the buildings, and along several transects across the subject property. Access or visibility limitations, if any, are discussed in Section 2.6. Subject property photographs are included in Appendix V.

7.2 On-Site Features

The subject property is an approximate 1,407.5805-acre tract that is located on Miller County Road 64, south of UD Highway 67 and Interstate 30. The subject property consists of agricultural and undeveloped land. Structures on the subject propery included a dilapidated house on the central portion, a pole-barn, barn, and residence on the northern portion, a former rendering plant on the eastern portion, and several outbuildings such as a storehouse and sheds. Signs of other former structures, namely foundations, were observed on the northern portion of the subject property. Structures on the subject property did not appear to be heated or cooled, with the exception of the former rendering plant, which had a boiler for operations and the eastern house, which had propane tank located to the west of it. The subject property was served by four observed water supply wells, mainly for livestock use. The subject property did not appear to have an operational sewage, however a suspected septic system was observed near the west of the eastern house.

Four ponds were observed on the subject property. One pond was observed on the northern portion of the subject property, along US Highway 67 and Interstate 30. A second pond was observed near the eastern boundary of the subject property, north of the former rendering plant. Another pond was located on the northeastern portion of the subject property, just north of a gate leading to the wooded portion of the property. The fourth pond was observed in the wooded portion of the subject property.

A drainage ditch was observed running northwest to southeast through the western portion of the subject property. A drainage canal was observed along the eastern boundary of the subject property. ECS did not observe dumping or petroleum sheens on or around the surface waters on the subject property.

Several containers of herbicides, pesticides, paint, and vehicle maintenance supplies were observed in the pole barn and metal barn on the northern portion of the subject property. Staining was not observed on the containers and the ground surfaces in the vicinity of the containers.

Ten pole-mounted transformers are located throughout the subject property, near buildings and water supply wells. Staining, which could be indicative of leakage, was not observed on the transformer or surfaces in the vicinity of the transformers.

We observed four water supply wells associated with the subject property. The water supply wells have corrugated steel covers and concrete bases. The wells were located: near a water trough on the western portion of the subject property, near the dilapidated house along County Road 64 on the central portion of the property, near water troughs on northeastern portion of the property, and on the northeastern portion of the property near the gate to the wooded area.

The table below lists pertinent features of interest that were assessed for the subject property. Relevant information regarding pertinent features is discussed further in this section.

Feature	Yes	No
Underground or aboveground storage tanks		×
Strong, pungent or noxious odors		×
Surface waters	~	
Standing pools of liquid likely containing petroleum or hazardous substances		~
Drums or containers of petroleum or hazardous substances greater than five-gallons		~
Drums or containers of petroleum or hazardous substances less than or equal to five-gallons	~	
Unidentified opened or damaged containers of hazardous substances or petroleum products		~
Known or suspect PCB-containing equipment (excluding light ballasts)	~	
Stains or corrosion to floors, walls or ceilings		~
Floor drains and sump pumps		~
Pits, ponds or lagoons		~
Stained soil or pavement		~
Stressed vegetation		~
Solid waste mounds or non-natural fill materials		~
Wastewater discharges into drains, ditches or streams		~
Groundwater wells including potable, monitoring, dry, irrigation, injections and/or abandoned	~	
Septic systems or cesspools	~	
Elevators		~
Dry cleaning		~
Onsite emergency electrical generators		~

Feature	Yes	No
Specialized industrial equipment (paint booths, bag houses, etc.,) on-site		~
Hydraulic lifts		~
Oil-water separators		~
Compressors on-site	~	
Grease traps		~

Surface waters

Four ponds were observed on the subject property. One pond was observed on the northern portion of the subject property, along US Highway 67 and Interstate 30. A second pond was observed near the eastern boundary of the subject property, north of the former rendering plant. Another pond was located on the northeastern portion of the subject property, just north of a gate leading to the wooded portion of the property. The fourth pond was observed in the wooded portion of the subject property.

A drainage ditch was observed running northwest to southeast through the western portion of the subject property. A drainage canal was observed along the eastern boundary of the subject property. ECS did not observe dumping or petroleum sheens on or around the surface waters on the subject property.

Drums or containers of petroleum or hazardous substances less than or equal to five-gallons

Several containers of herbicides, pesticides, paint, and vehicle maintenance supplies were observed in the pole barn and metal barn on the northern portion of the subject property. Staining was not observed on the containers and the ground surfaces in the vicinity of the containers.

Known or suspect PCB-containing equipment (excluding light ballasts)

Ten pole-mounted transformers are located throughout the subject property, near buildings and water supply wells. Staining, which could be indicative of leakage, was not observed on the transformer or surfaces in the vicinity of the transformers.

Groundwater wells including potable, monitoring, dry, irrigation, injections and/or abandoned

We observed four water supply wells associated with the subject property. The water supply wells have corrugated steel covers and concrete bases. The wells were located: near a water trough on the western portion of the subject property, near the dilapidated house along County Road 64 on the central portion of the property, near water troughs on northeastern portion of the property, and on the northeastern portion of the property near the gate to the wooded area.

Septic systems or cesspools

The eastern house is serviced by a septic tank. Sinks and toilets reportedly discharged into the septic system when the house was occupied.

Compressors on-site

Two man-portable compressors were associated with the facility. The compressors are located in and near the pole barn on the northern portion of the subject property. Oil stained grass and soil were not observed in the vicinity of the compressors.

7.3 Adjoining and Nearby Properties

Contiguous and nearby properties were observed during a walking and vehicular reconnaissance of the subject property boundary and public places. The subject property is located in a rural, agricultural area of Texarkana, Miller County, Arkansas.

Direction	Description	Relative Gradient	REC
North	US Highway 67, a railroad, Interstate 30, and undeveloped land with residential and agricultural land beyond the roads.	Up-gradient	No
East	Undeveloped and agricultural land	Cross-gradient	No
South	Undeveloped and residential land	Down-gradient	No
West	Agricultural land	Cross-gradient	No

7.4 Site and Area Reconnaissance Summary

According to our site observations and a review of adjoining and nearby properties, the subject property is used as cattle pasture with the easternmost, wooded area, being undeveloped. The subject property is located in a rural, agricultural area. Details pertaining to our on-site and off-site observations are referenced previously. We did not identify RECs associated with the subject property or neighboring properties and businesses during the reconnaissance.

8.0 ADDITIONAL SERVICES

ASTM guidelines identify non-scope issues, which are beyond the scope of this practice. Non-scope issues have the potential to be business environmental risks. Some of these non-scope issues include; asbestos-containing building materials, radon, lead-based paint, lead in drinking water, wetlands and mold.

ECS was not authorized to assess non-scope issues in conjunction with this assessment.

9.0 INTERVIEWS

During the site reconnaissance, Roger Willis interviewed Mr. Skipper Davis. He has over 16 years of knowledge related to the subject property and associated activities. He indicated that the steel tank near the railroad tracks had not been used on the subject property and had likely been used to store water. He also indicated that the concrete building on the eastern portion of the subject property was a former rendering plant used to process unused offal from cattle ranching operations on the property and had been out of use for over 30 years. Mr. Davis indicated that he is not aware of 1) environmental concerns associated with the subject property; 2) any pending, past, or threatened administrative litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or 3) any government notices regarding any possible violation of environmental laws or possible liability related to hazardous substances or petroleum products.

10.0 FINDINGS AND CONCLUSIONS

The subject property is identified by the Miller County Assessor as Property Identification Numbers (PIN) 00027500, 00032800, 00033200, 00034401, and 00034700 and owned by City of Texarkana Public Facilities Board. The approximately 1,407.5805-acre subject property is occupied by two former single family residence, a pole barn, a corrugated steel barn, a former rendering plant, and two shipping containers used for storage. The subject property is serviced by well water with no operating sewage system on the property, however the eastern house was formerly serviced by a septic system. The residences and rendering plant were formerly heated with wood and propane.

The subject property is located in a rural, agricultural area of Texarkana, Arkansas. The subject property is bound on the north by US Highway 67, a railroad, Interstate 30, and undeveloped land with residential and agricultural land beyond the roads, on the east by undeveloped and agricultural land, on the south by undeveloped and agricultural land, and on the west by agricultural land. ECS did not identify environmental issues at adjoining or nearby properties that are believed to present a recognized environmental condition (REC) at the subject property.

Based on the records search, site reconnaissance and interviews, it appears that the subject property was developed with several residences and agricultural buildings since at least 1948. Over time, the residences have been abandoned or repurposed, leaving agricultural and undeveloped land supported by two centrally located barns along County Road 64. Historical records prior to 1948 were not reasonably ascertainable for the subject property.

Our review of historical information for adjoining or nearby properties identified the area as originally rural, agricultural land that has remained so for several decades.

A regulatory database search report was provided by Environmental Data Resources. The database search involves researching a series of Federal, State, Local, and other databases for facilities and properties that are located within specified minimum search distances from the subject property. The report did identify the subject property on the databases researched. The Environmental Data Resources report identified several off-site properties within the minimum ASTM search distances. Based on our review of available public records, none of the listings are believed to represent a REC for the subject property.

ASTM E1527-13 defines a "data gap" as: "a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information." Data gaps which would be expected to impact our ability to render a professional opinion concerning the subject property were not identified.

We have performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM E1527-13 of the REDI Arkansas Manufacturing Center located at US Highway 67 and Miller County Road 64 in Texarkana, Miller County, Arkansas. Exceptions to, or deletions from, this practice are described in Section 2.6 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the property.

The following Business Environmental Risks (BERs) and/or additional considerations were identified:

• An unused steel tank was observed on the northern boundary of the subject property, west of the County Road 64 railroad crossing. Mr. Skipper Davis was unsure of the tanks origin or prior use. ECS considers the unused steel tank to represent a BER for the subject property due the lack of documentation or knowledge with regards to its origins or prior use.

Will you provide Property Title Records and a Legal Description to ECS?

Please select one:

YES

Will you provide a 50-year chain of title abstract to ECS? NO

NO

Please select one:

YES

Please Send Information Promptly

(1a.) Environmental liens that are filed or recorded against the site (40 CFR 312.25). ASTM E 1527-13 states that the user should perform a review of recorded land title records and judicial records for environmental liens or activity and use limitations for the site. Please forward the results of the land title record and judicial record review. If you would prefer, ECS can obtain this information from a third party provider for an additional fee. Please let ECS know if you would like to contract ECS for this service.

Please select one: Client to Provide ECS to Provide for Additional Fee (1b.) Activity and use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26). Are you aware of any activity and use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

Please select one: If yes, please explain:	NO	YES	

(2.) Specialized knowledge - As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Please select one: If yes, please explain:	NO V	YES	

- (3.) Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:
- (a.) Do you know the past uses of the property?

		/		
CATTLE	FARMING	GRAZING	WALNUT	ORCHARD
Please select one: If yes, please state uses:	NO 🗌	YES	1	

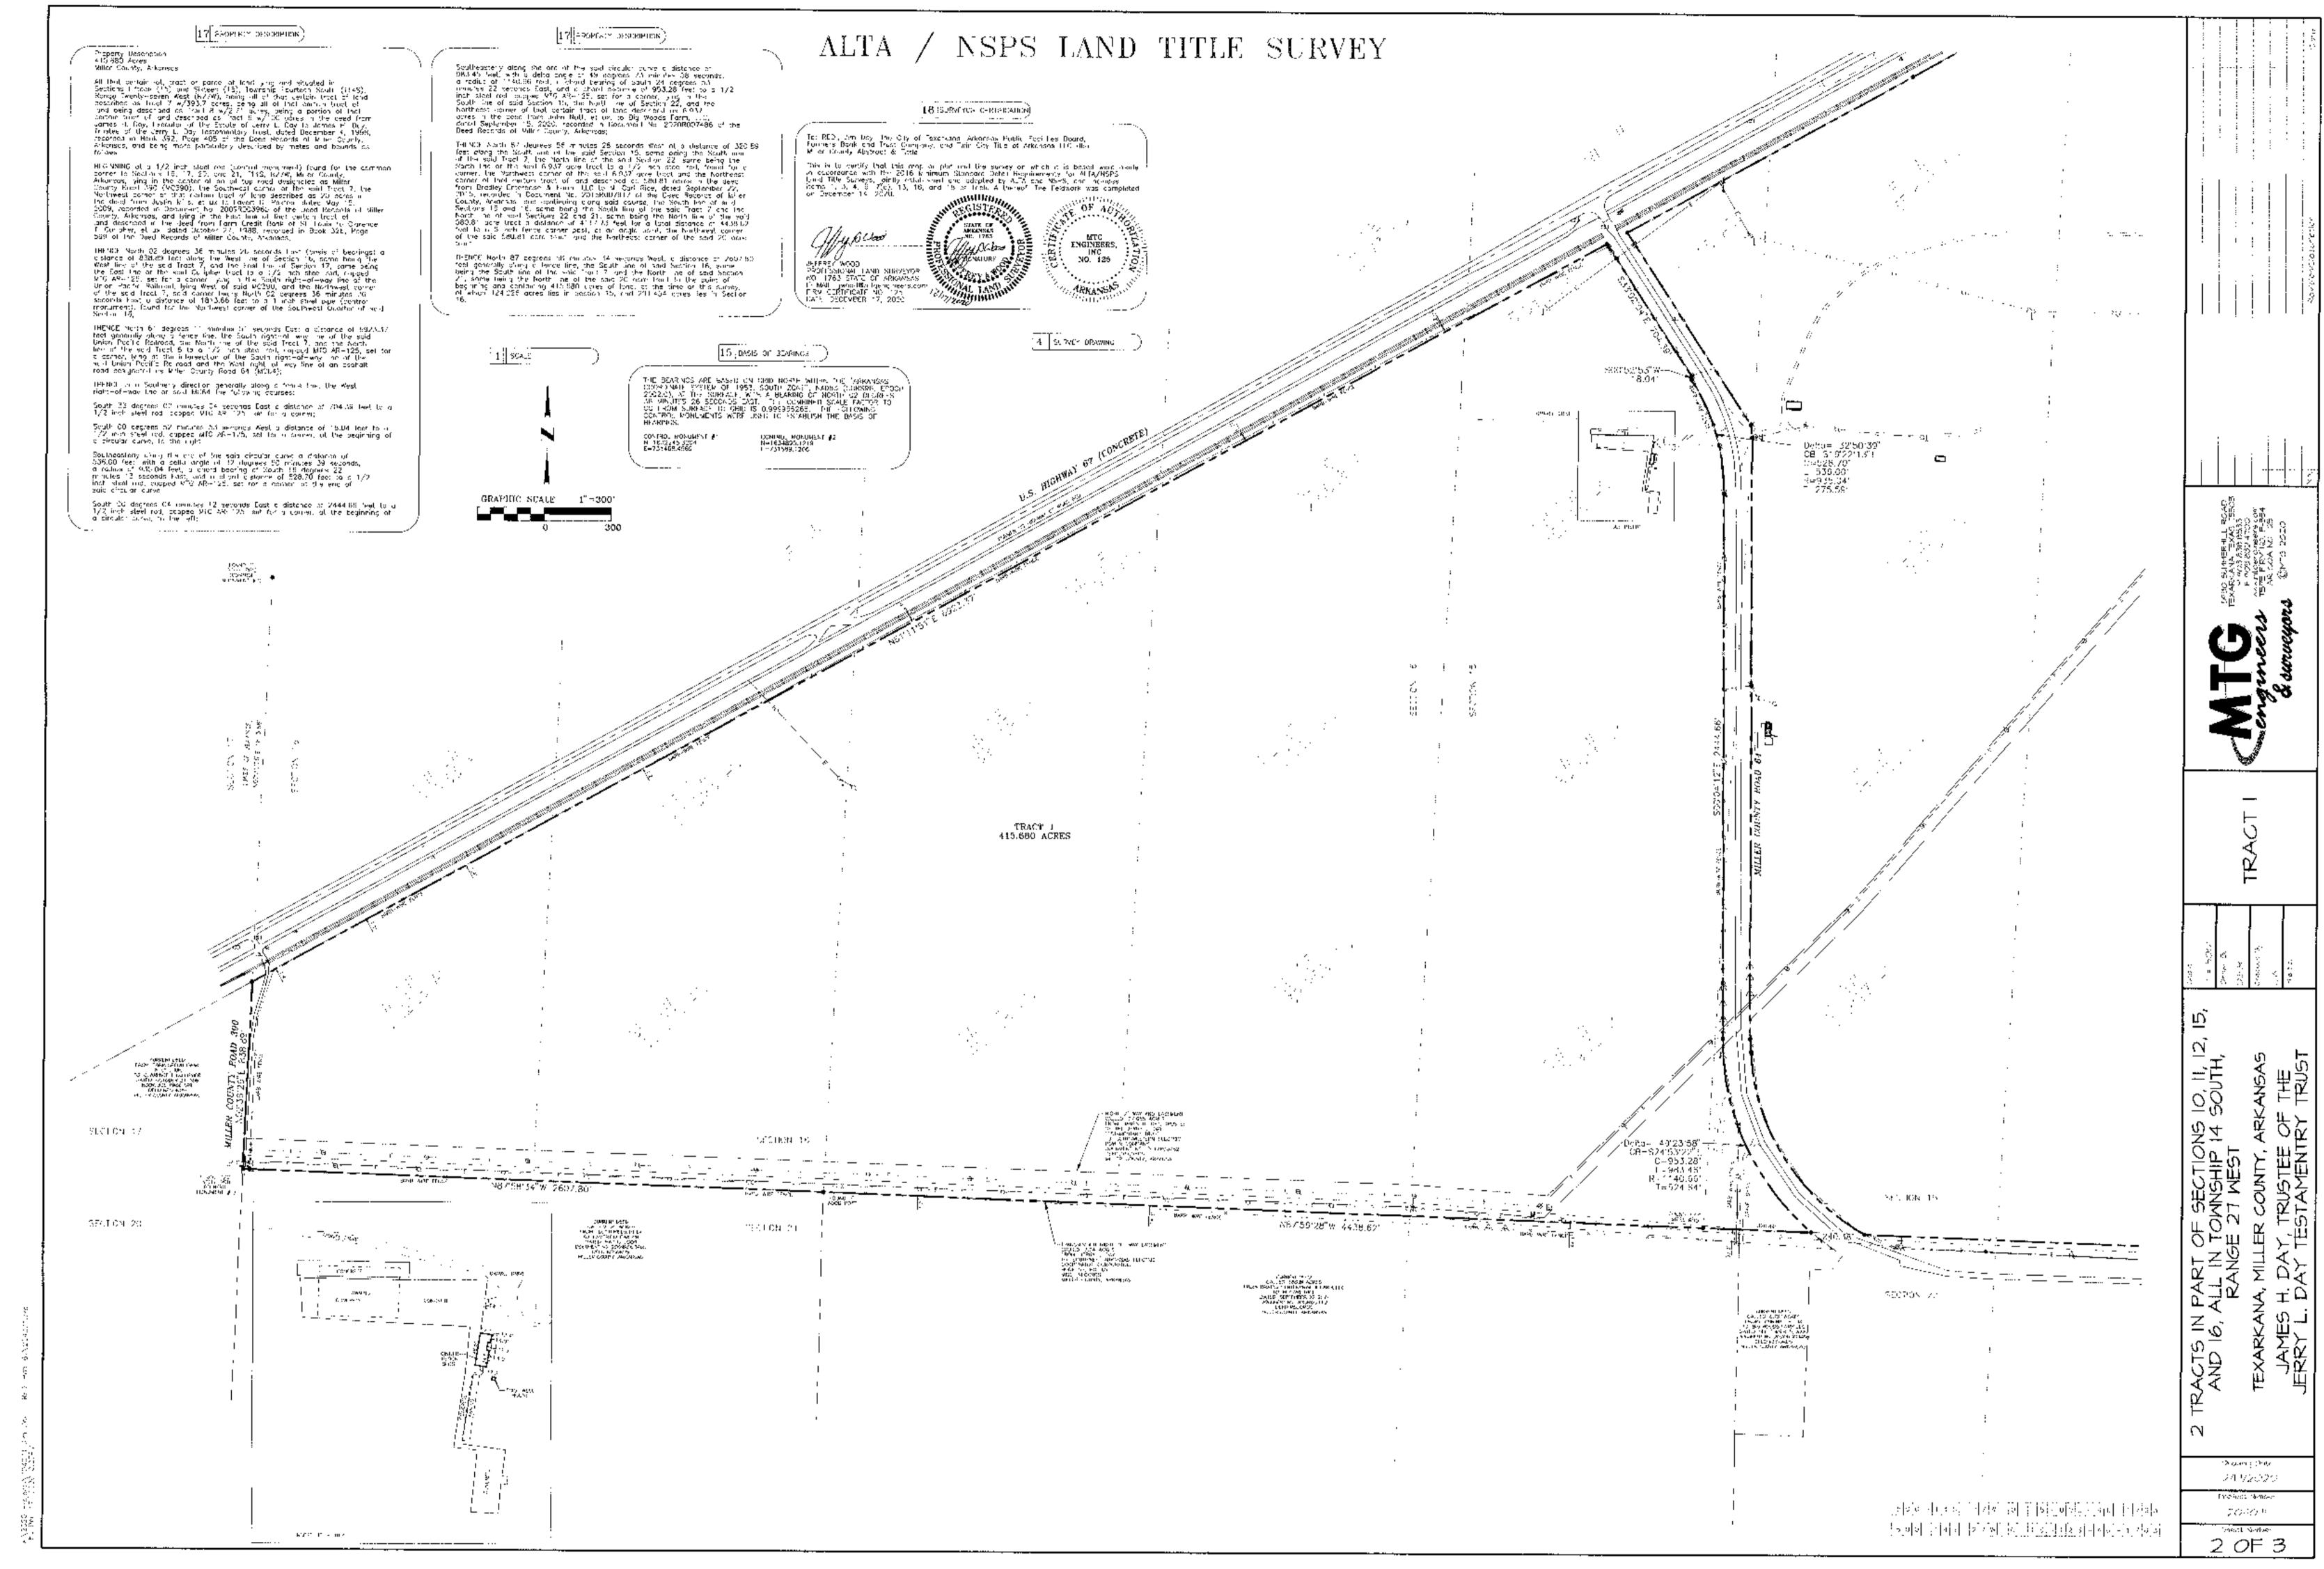

(b.) Do you know of specific chemicals that are present or once were present at the property?

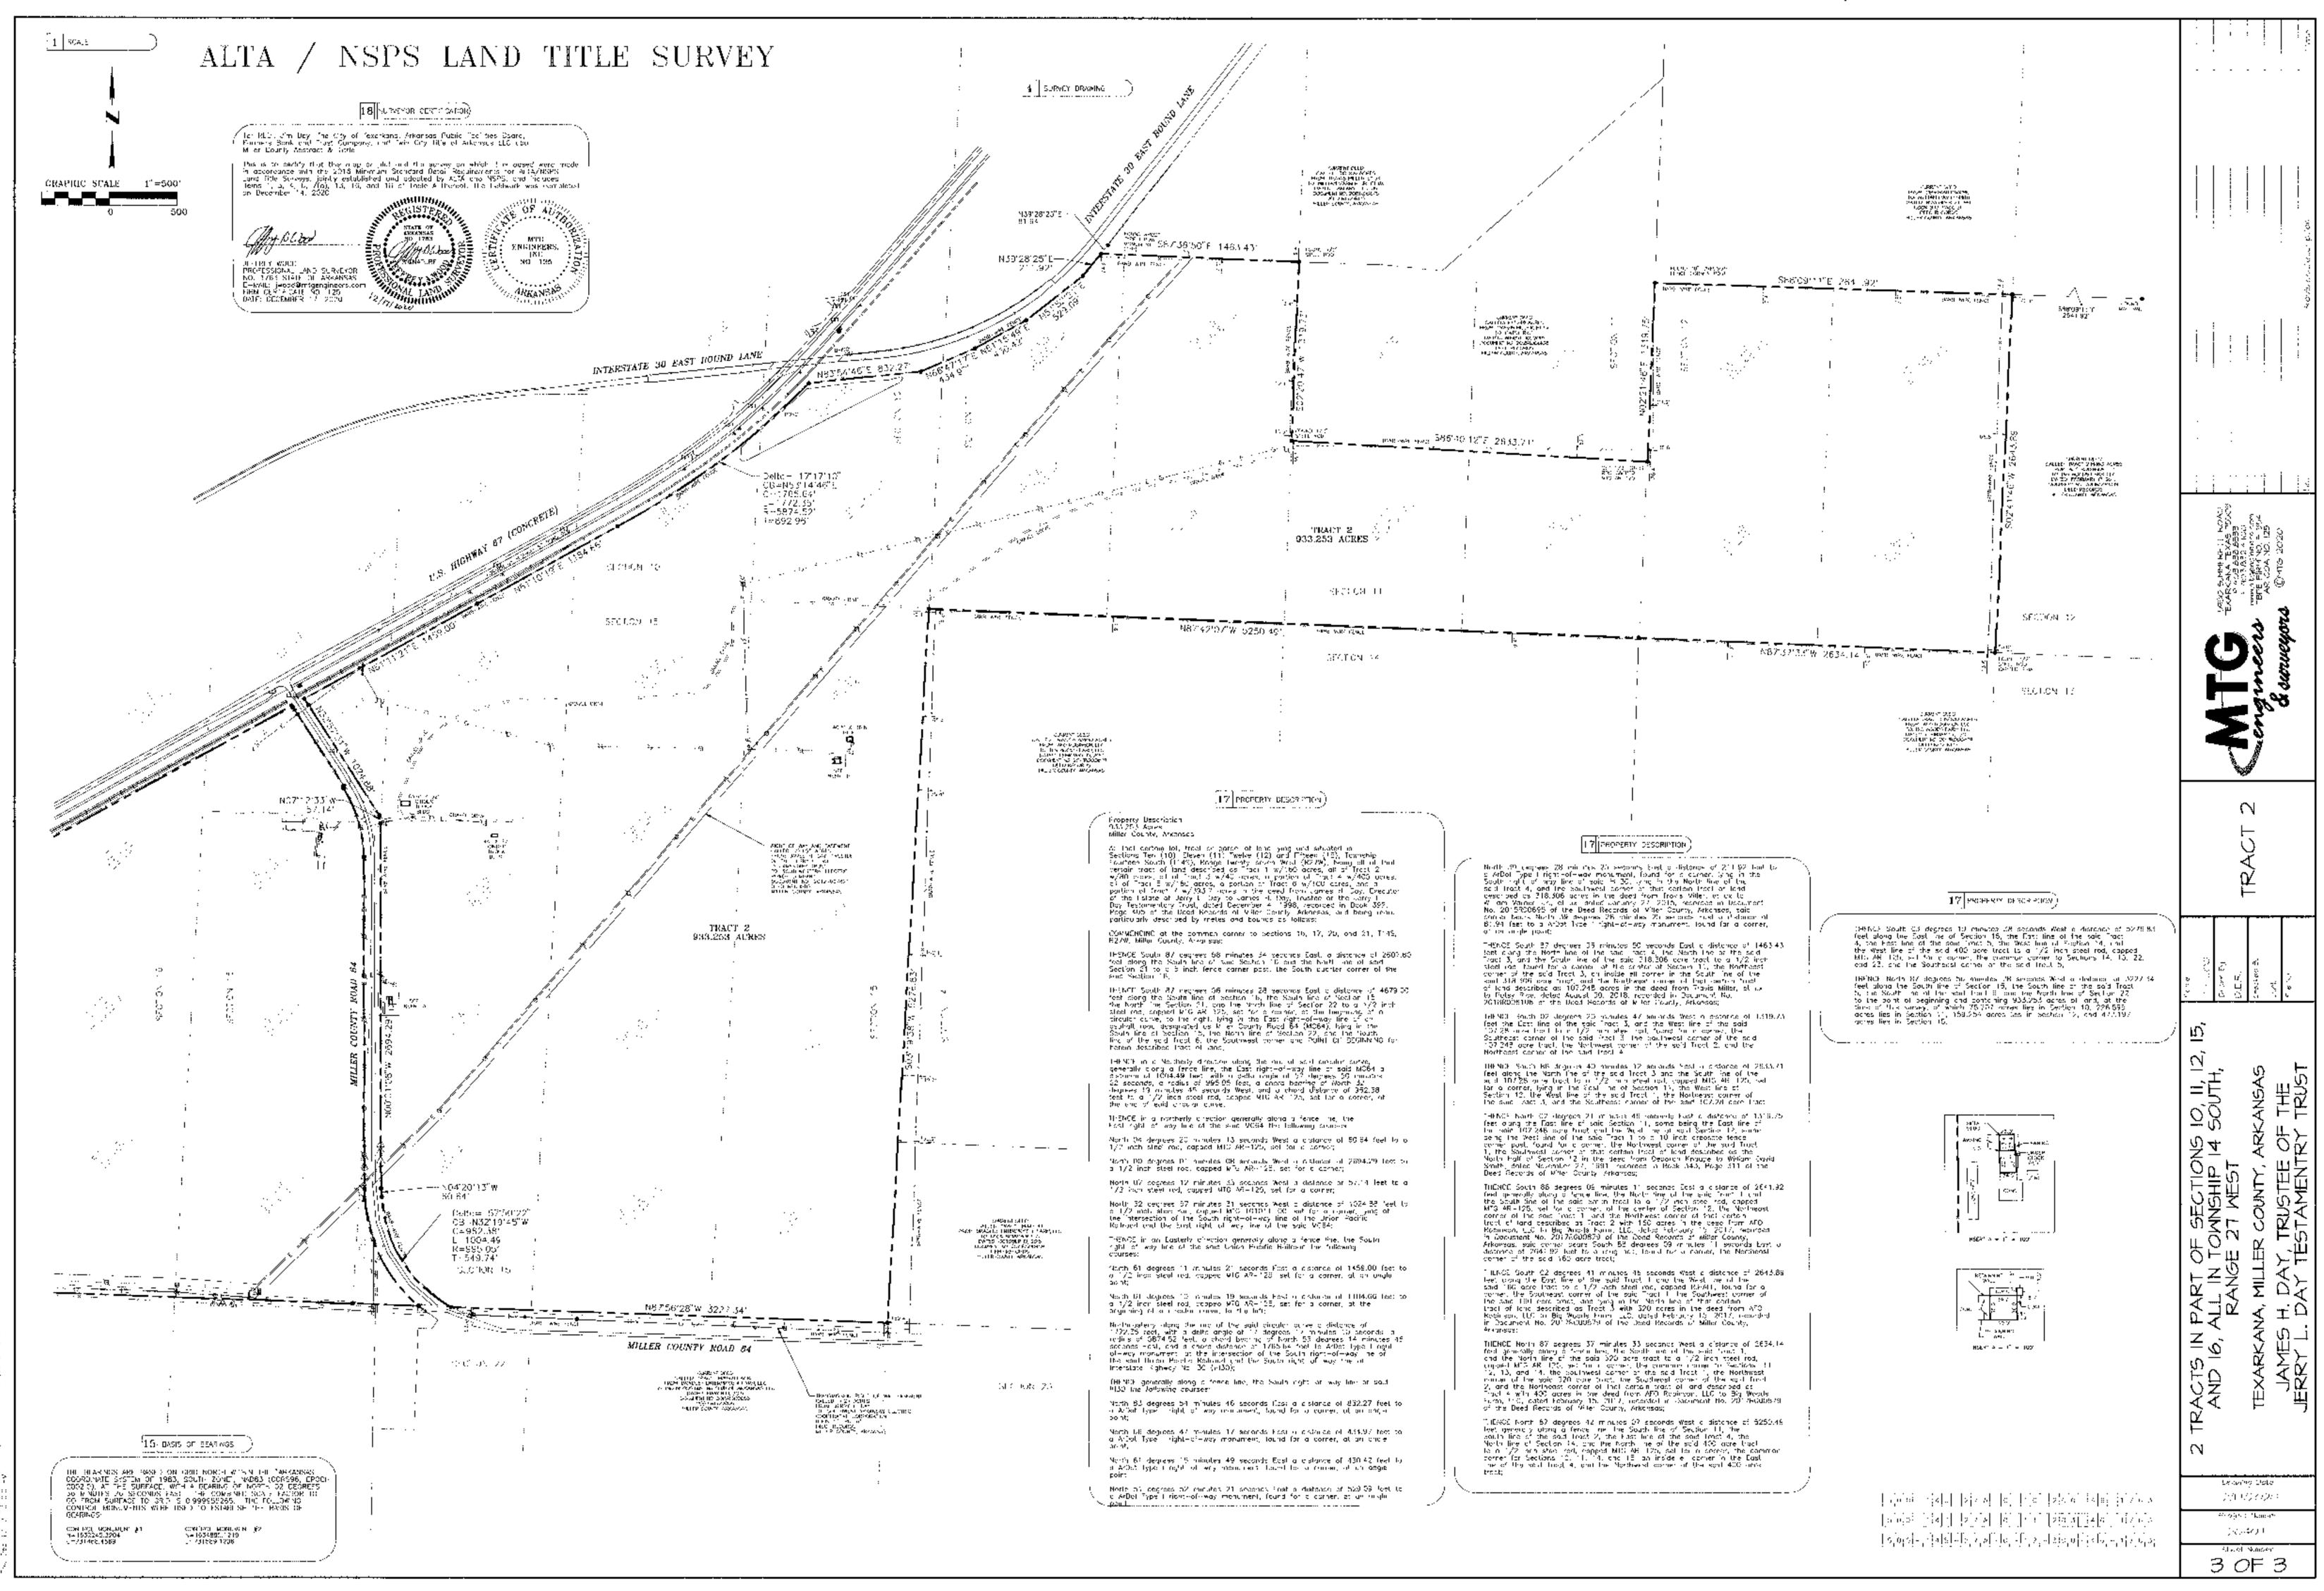

Please select one: If yes, please explain:	NO 📝	YES	
(c.) Do you know of spills o	r other chemical rel	eases that have taken place al	t the property?

Roger Willis, M.S.

From:Joe Bennett <joe.bennett@millercountyar.com>Sent:Tuesday, March 16, 2021 11:54 AMTo:Roger Willis, M.S.Subject:RE: Open Records Request

Mr. Willis,

Prior to my appointment in 2019, I doubt there were any records pertaining to the listed parcels as there is very limited information on any hazardous material responses in Miller County.

I'm checking with UPRR for any past railway issues along this corridor. My only experience in this area is with River Valley Animal Feeds at 5465 Miller County 64. Annually, I receive a Tier II report which provides information on the fixed facility.

My concern is how the SFHA will be addressed. Miller County is a NFIP community partner and has an established ordinance governing substantial improvements within a SFHA. I'll be the contact for Floodplain Administration.

I apologize for the lack of record keeping, but I hope this helps.

Joe Bennett, Coordinator Miller County Office of Emergency Management 911 Coord, FPA, Fire Service Coord. O: 870.772.2592 C: 870.703.8026

From: Roger Willis, M.S. <RWillis@ecslimited.com>
Sent: Monday, March 15, 2021 3:56 PM
To: Joe Bennett <joe.bennett@millercountyar.com>
Subject: Open Records Request

Mr. Bennett,

We are conducting a Phase I Environmental Site Assessment for the old Day Ranch on County Road 64, south of the intersection with Highway 67 and Interstate 30. I'd like to request any records that Miller County Emergency Management may have pertaining to hazardous materials responses or permits for the property. The subject property consists of Miller County parcels 00027500, 00032800, 00033200, 00034401, and 00034700.

Please let me know if you need any additional information or if I should reach out to someone else.

Thank you

ROGER WILLIS, M.S. | Environmental Project Manager T 512.837.8005 | D 512.379.7504

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/28/2020 Date Data Arrived at EDR: 11/05/2020 Date Made Active in Reports: 11/25/2020 Number of Days to Update: 20 Source: EPA Telephone: N/A Last EDR Contact: 01/14/2021 Next Scheduled EDR Contact: 04/12/2021 Data Release Frequency: Quarterly

NPL Site Boundaries

EPA Region 8 Telephone: 303-312-6774

EPA Region 9 Telephone: 415-947-4246

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/28/2020 Date Data Arrived at EDR: 11/05/2020 Date Made Active in Reports: 11/25/2020 Number of Days to Update: 20 Source: EPA Telephone: N/A Last EDR Contact: 01/14/2021 Next Scheduled EDR Contact: 04/12/2021 Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 10/15/1991 Date Data Arrived at EDR: 02/02/1994 Date Made Active in Reports: 03/30/1994 Number of Days to Update: 56 Source: EPA Telephone: 202-564-4267 Last EDR Contact: 08/15/2011 Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/28/2020 Date Data Arrived at EDR: 11/05/2020 Date Made Active in Reports: 11/25/2020 Number of Days to Update: 20 Source: EPA Telephone: N/A Last EDR Contact: 01/14/2021 Next Scheduled EDR Contact: 04/12/2021 Data Release Frequency: Quarterly

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019 Date Data Arrived at EDR: 04/05/2019 Date Made Active in Reports: 05/14/2019 Number of Days to Update: 39 Source: Environmental Protection Agency Telephone: 703-603-8704 Last EDR Contact: 12/23/2020 Next Scheduled EDR Contact: 04/12/2021 Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/28/2020 Date Data Arrived at EDR: 11/05/2020 Date Made Active in Reports: 11/25/2020 Number of Days to Update: 20 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 01/14/2021 Next Scheduled EDR Contact: 04/26/2021 Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/28/2020 Date Data Arrived at EDR: 11/05/2020 Date Made Active in Reports: 11/25/2020 Number of Days to Update: 20 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 01/14/2021 Next Scheduled EDR Contact: 04/26/2021 Data Release Frequency: Quarterly

Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/14/2020 Date Data Arrived at EDR: 12/17/2020 Date Made Active in Reports: 12/22/2020 Number of Days to Update: 5 Source: Environmental Protection Agency Telephone: 214-665-6444 Last EDR Contact: 12/17/2020 Next Scheduled EDR Contact: 04/05/2021 Data Release Frequency: Quarterly

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020 Date Data Arrived at EDR: 12/17/2020 Date Made Active in Reports: 12/22/2020 Number of Days to Update: 5 Source: Environmental Protection Agency Telephone: 214-665-6444 Last EDR Contact: 12/17/2020 Next Scheduled EDR Contact: 04/05/2021 Data Release Frequency: Quarterly

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/14/2020 Date Data Arrived at EDR: 12/17/2020 Date Made Active in Reports: 12/22/2020 Number of Days to Update: 5 Source: Environmental Protection Agency Telephone: 214-665-6444 Last EDR Contact: 12/17/2020 Next Scheduled EDR Contact: 04/05/2021 Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators) RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020 Date Data Arrived at EDR: 12/17/2020 Date Made Active in Reports: 12/22/2020 Number of Days to Update: 5 Source: Environmental Protection Agency Telephone: 214-665-6444 Last EDR Contact: 12/17/2020 Next Scheduled EDR Contact: 04/05/2021 Data Release Frequency: Quarterly

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 09/14/2020 Date Data Arrived at EDR: 09/15/2020 Date Made Active in Reports: 12/10/2020 Number of Days to Update: 86 Source: Environmental Protection Agency Telephone: 202-566-2777 Last EDR Contact: 12/11/2020 Next Scheduled EDR Contact: 03/29/2021 Data Release Frequency: Semi-Annually

Local Lists of Landfill / Solid Waste Disposal Sites

	Data Release Frequency: Varies

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 03/18/2020 Date Data Arrived at EDR: 03/19/2020 Date Made Active in Reports: 06/09/2020 Number of Days to Update: 82 Source: Drug Enforcement Administration Telephone: 202-307-1000 Last EDR Contact: 11/16/2020 Next Scheduled EDR Contact: 03/08/2021 Data Release Frequency: Quarterly

PFAS: Per- and Polyfluoroalkyl Substances

A listing of PFAS contaminated sites. PFAS is a class of chemicals that includes PFOA (perfluorooctanoic acid), PFOS (perfluorooctanesulfonic acid), PFNA (perfluorononanoic acid) and PFHxA (perfluorohexanoic acid). PFOA and PFOS, are the most commonly found and potent PFASs at contamination sites.

Date of Government Version: 09/10/2020 Date Data Arrived at EDR: 09/15/2020 Date Made Active in Reports: 12/07/2020 Number of Days to Update: 83 Source: Department of Environmental Quality Telephone: 501-683-6977 Last EDR Contact: 12/01/2020 Next Scheduled EDR Contact: 03/22/2021 Data Release Frequency: Varies

Local Land Records

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 10/28/2020 Date Data Arrived at EDR: 11/05/2020 Date Made Active in Reports: 11/25/2020 Number of Days to Update: 20 Source: Environmental Protection Agency Telephone: 202-564-6023 Last EDR Contact: 01/14/2021 Next Scheduled EDR Contact: 04/12/2021 Data Release Frequency: Semi-Annually

Records of Emergency Release Reports

HMIRS: Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 09/20/2020	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 09/22/2020	Telephone: 202-366-4555

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 12/14/2020 Date Data Arrived at EDR: 12/17/2020 Date Made Active in Reports: 12/22/2020 Number of Days to Update: 5 Source: Environmental Protection Agency Telephone: 214-665-6444 Last EDR Contact: 12/17/2020 Next Scheduled EDR Contact: 04/05/2021 Data Release Frequency: Quarterly

FUDS: Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 09/29/2020	Source: U.S. Army Corps of Engineers
Date Data Arrived at EDR: 11/17/2020	Telephone: 202-528-4285

US FIN ASSUR: Financial Assurance Information

All owners and operators of facilities that treat, store, or dispose of hazardous waste are required to provide proof that they will have sufficient funds to pay for the clean up, closure, and post-closure care of their facilities.

Date of Government Version: 09/21/2020 Date Data Arrived at EDR: 09/22/2020 Date Made Active in Reports: 12/14/2020 Number of Days to Update: 83 Source: Environmental Protection Agency Telephone: 202-566-1917 Last EDR Contact: 12/17/2020 Next Scheduled EDR Contact: 04/05/2021 Data Release Frequency: Quarterly

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014 Number of Days to Update: 88 Source: Environmental Protection Agency Telephone: 617-520-3000 Last EDR Contact: 02/02/2021 Next Scheduled EDR Contact: 05/17/2021 Data Release Frequency: Quarterly

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017 Date Data Arrived at EDR: 05/08/2018 Date Made Active in Reports: 07/20/2018 Number of Days to Update: 73 Source: Environmental Protection Agency Telephone: 703-308-4044 Last EDR Contact: 11/06/2020 Next Scheduled EDR Contact: 02/15/2021 Data Release Frequency: Varies

TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2016 Date Data Arrived at EDR: 06/17/2020 Date Made Active in Reports: 09/10/2020 Number of Days to Update: 85 Source: EPA Telephone: 202-260-5521 Last EDR Contact: 12/18/2020 Next Scheduled EDR Contact: 03/29/2021 Data Release Frequency: Every 4 Years

TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2018 Date Data Arrived at EDR: 08/14/2020 Date Made Active in Reports: 11/04/2020 Number of Days to Update: 82 Source: EPA Telephone: 202-566-0250 Last EDR Contact: 02/02/2021 Next Scheduled EDR Contact: 03/01/2021 Data Release Frequency: Annually

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 11/02/2020 Date Data Arrived at EDR: 11/12/2020 Date Made Active in Reports: 01/25/2021 Number of Days to Update: 74 Source: Environmental Protection Agency Telephone: 202-564-8600 Last EDR Contact: 01/19/2021 Next Scheduled EDR Contact: 05/03/2021 Data Release Frequency: Varies

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995 Date Data Arrived at EDR: 07/03/1995 Date Made Active in Reports: 08/07/1995 Number of Days to Update: 35 Source: EPA Telephone: 202-564-4104 Last EDR Contact: 06/02/2008 Next Scheduled EDR Contact: 09/01/2008 Data Release Frequency: No Update Planned

RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 07/01/2019 Date Data Arrived at EDR: 07/01/2019 Date Made Active in Reports: 09/23/2019 Number of Days to Update: 84 Source: Environmental Protection Agency Telephone: 202-343-9775 Last EDR Contact: 01/08/2021 Next Scheduled EDR Contact: 04/12/2021 Data Release Frequency: Quarterly

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006 Date Data Arrived at EDR: 03/01/2007 Date Made Active in Reports: 04/10/2007 Number of Days to Update: 40

FUSRAP: Formerly Utilized Sites Remedial Action Program

DOE established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations.

Date of Government Version: 08/08/2017 Date Data Arrived at EDR: 09/11/2018 Date Made Active in Reports: 09/14/2018 Number of Days to Update: 3 Source: Department of Energy Telephone: 202-586-3559 Last EDR Contact: 02/02/2021 Next Scheduled EDR Contact: 05/17/2021 Data Release Frequency: Varies

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

RGA HWS: Recovered Government Archive State Hazardous Waste Facilities List The EDR Recovered Government Archive State Hazardous Waste database provides a list of SHWS incidents derived from historical databases and includes many records that no longer appear in current government lists. OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

Appendix VI: Statement of Qualifications

Roger S. Willis II.

EDUCATION

Master of Science, 2013, Environmental Science, University of Texas – San Antonio, San Antonio, Texas

Bachelor of Science, 2009, Biology, University of Georgia, Athens, Georgia

CERTIFICATIONS

Phasel/PhaseII ESA - ASTM Certified 40-hour HAZWOPER Wetland Delineation – Wetland Training Institute

Mr. Willis is the Environmental Project Manager for ECS Texas, LLP (ECS) in our Austin, Texas office. Since he has started with ECS in the spring of 2014, Mr. Willis has had experience on numerous geotechnical and environmental consulting projects. Mr. Willis has significant experience working in laboratories and the field in addition to conducting and assisting with scientific research. Additionally, he has experience working with Texas and federal environmental law. His present responsibilities include project management, field testing, reporting, and business development for the environmental and geotechnical services departments in our Texas operations. Mr. Willis has performed environmental studies in Texas, Louisiana, Oklahoma, Arizona, Utah, Ohio, Connecticut, Massachusetts, and Rhode Island as well as scientific field studies in North Carolina, Georgia, and Texas.

ENVIRONMENTAL ASSESSMENTS - Mr. Willis has performed numerous Phase I Environmental Site Assessments (ESAs) consisting of observation and research/inquiry studies to identify potential environmental liabilities relative to real estate transactions. Project types range from residential developments to commercial business properties, industrial facilities, and publicly owned facilities. Mr. Willis also has experience performing Phase II Limited Site Investigations – sampling soil and groundwater, directing drilling crews, and designing and reporting sound scientific analysis. Mr. Willis has conducted Environmental Review for Environmental Assessments, as well as Environmental Exit Audits.

Environmental Project Manager

NATURAL RESOURCES ASSESSMENTS – Mr. Willis has conducted several wetlands, endangered species, and geologic assessments consisting of site reconnaissance, records reviews, and reporting. Mr. Willis has experience working with federal, state, county, and municipal regulators to successfully complete these projects.

SAMPLE ENVIRONMENTAL PROJECT EXPERIENCE

- 115 Wild Basin, Austin, Texas
- Old Dowlen Road Wetlands, Beaumont, Texas
- Stream Delineation, Del Valle, Texas
- Hydraulic Tank Closure, TX, UT, OH, CT, RI, MA

SAMPLE PHASE I/II PROJECT EXPERIENCE

- Multi Family Development, San Antonio, Texas
- Credit Union, Katy, Texas
- Multi Family Development, Dripping Springs, Texas
- Oil Change Shop, Pflugerville, Texas
- Auto Parts Store, Helotes, Texas
- Auto Parts Store, Baytown, Texas
- Multi Family Development, Austin, Texas
- Assisted Living Facility, Kyle, Texas
- Single Family Development, Leander, Texas
- Retail Center, San Marcos, Texas
- Block 107, Houston, Texas
- Automotive Repair Shop, Hill Country Village, Texas
- Single Family Development, Odessa, Texas
- Fast Casual Restaurant, Tulsa Oklahoma

SAMPLE GEOTECHNICAL PROJECT EXPERIENCE

- Retail Center, Spicewood, Texas
- Armed Services YMCA, Harker Heights, Texas
- Single Family Development, Horseshoe Bay, Texas
- Large Grocery Store, Austin, Texas
- Electrical Resistivity Testing, Fort Stockon Area, Texas

EDUCATION

Master of Science, 2013, Environmental Planning, American Public University, Charles Town, WV

> Bachelor of Science, 1995, Environmental Biology and Management, University of California, Davis, CA

PROFESSIONAL PROFILE

Mr. Hiatt serves as the Director of Environmental Services for our ECS Southwest, LLP subsidiary. Mr. Hiatt has over 21 years of experience in the environmental planning, permitting, NEPA and CEQA documentation, environmental compliance, soil and groundwater remediation, and due diligence. Mr. Hiatt is responsible for management and oversight of ECS environmental services.

Mr. Hiatt has performed numerous Phase I and Phase II Environmental Site Assessments (ESAs) consisting of observation/ research/ inquiry studies to identify potential environmental liabilities. He has experience performing preliminary environmental site assessments to evaluate on-site and offsite concerns that may impact the site soil and/or groundwater. Mr. Hiatt conducts and oversees wetland delineations, coordinates Endangered Species Act compliance, and coordinates Jurisdictional Determinations with the State and U.S. Army Corps of Engineers (USACE). He also oversees and prepares Section 404/401 Individual Permit Applications, Joint Permit Applications, State Programmatic General Permit Applications and Nationwide Permit Applications.

PROJECT EXPERIENCE

- City of Carrollton, TX Golf Course Wetland Delineation
- City of Garland , TX Asbestos Survey
- Bastrop UST Removal, Bastrop, TX
- XS Ranch Community Center, Bastrop, TX
- Weslayan Mold Remediation, Georgetown, TX
- Bluff Bend Warehouse, Austin, TX
- Solavera Unit K, Ambient Air Sampling, Austin, TX
- Bluff Springs, Phase I ESA, Austin, TX
- Bratton Lane Peer Review and Water Sampling, Austin, TX
- Walnut Hill Property Landfill Permitting Assistance, Dallas, TX
- Flower Mound Tract, Flower Mound, TX
- Borgfeld Manor ACM and LBP, Cibolo, TX
- Premier Lady Fitness ACM Abatement, Austin, TX
- Dollar General Baytown, Baytown, TX
- Proposed LFT Friendswood Wetland Delineation, Friendswood, TX
- LFT Cypress Wetland Delineation, Cypress, TX
